

GreenValley District Hospital

Infection Control Dept. - Policy Document (Photocopy)

Document No: ICD-POL-014-A Title: Hand Hygiene Policy
Version: 1.7 (Superseded draft on file) Effective: 03-Mar-2025

1. Purpose

This policy sets the standard for hand hygiene practice across clinical and support staff at GreenValley District Hospital to reduce healthcare associated infection risk.

2. Scope

Applies to doctors, nurses, paramedical staff and housekeeping staff working in the ICU, general wards, OPD and operation theatre.

3. When To Clean Hands

Staff must clean hands before touching a patient and after touching a patient. Staff must also clean hands before a clean procedure and after contact with body fluids.

4. Method

Hand rub solution should be used when hands are not soiled. Soap and water should be used when hands are visibly dirty.

5. Training

New staff are shown the hand hygiene method once during joining. There is no fixed schedule for refresher sessions at this time.
