

HAND HYGIENE POLICY
Effective Date: 2024-01-15
Review Date: 2025-01-15
Version: 3.0

This hand hygiene policy follows the WHO Five Moments for Hand Hygiene framework.
The five moments are: Before touching a patient, After body fluid exposure,
Before clean procedure, After touching patient, After touching surroundings.

Hand Hygiene Technique: Alcohol-based hand rub (ABHR): Apply and rub for 20-30 seconds.
Soap and water: Wash for 40-60 seconds. Surgical hand antisepsis: Scrub for 3-5 minutes.

Products: ABHR dispensers with 70% ethanol at point of care. Liquid soap at every sink.
Dispenser placement: within arm reach at bedside.

Training: Initial training within 48 hours of joining. Annual refresher training every 12 months.
Competency assessment via return demonstration with fluorescent gel.

Audit: Monthly hand hygiene audit by trained observer. Target $\geq 90\%$. Direct observation using WHO form.

Feedback: Ward-level feedback within 7 days. Individual feedback for non-compliance.
Corrective action: remedial training and root cause analysis. Performance appraisal integration.
